

There's a new kind of cupid out there, one that is known for sowing discord and trouble. He's called Anti-Cupid, and he's become a menace to those who love romance. How do some cupids come to be so wicked?

Read on... Love is a beautiful thing. It's one of the fundamental forces of the universe. It binds couples together, and keeps families together. But what happens when that love turns to hate? What happens when somebody poisons the well of love, so that love turns to bitterness and pain? That's the tragedy of Anti-Cupid.

First, a little history. In Greek mythology, there was a character called Eros, the god of love. He was the son of Aphrodite, the goddess of love and beauty. Eros was sort of a mischievous kid; he enjoyed playing tricks on people.

One day, he fell in love with a woman named Psyche. She was very beautiful, but she was married at the time. So Eros decided to take her by force. When he caught her alone at home, he told her that he would only give her pleasure if she let him have his way with her. She agreed, but she told her husband that she was being unfaithful to him with another man. He threatened to kill her if she didn't return to him immediately. When she refused, he threw her out on the street and turned her into a prostitute. Eros didn't let up on his pursuit of Psyche though. He even appeared in the form of a handsome young man to try to get her into bed with him.

In the end, she decided to become a prostitute of her own free will, so that she could earn enough money to give to the poor and support her mother and sister. She vowed to never let any man have power over her again. She cut off her hair and became a priestess of Artemis, the goddess of the hunt. She could now never marry or be in any kind of romantic relationship. She became immortal because she was never really human to begin with. And whenever she encountered a male Cupid, she would give him a good punch in the face!

Eros became extremely jealous of his rival, and he resolved to stop any human from ever falling in love again. So he devised a plan to create an army of cruel Cupids that would spread misery and heartbreak throughout the world.
